Here were half a dozen Easter girls costumed for church, their gloves and veils and trim boots in dainty harmony with hats and wraps and dresses; be hind them followed, after an interval, smart matrons prepared for morning shopping, and behind these came women accoutred at all points for spring alls or afternoon receptions. Now one would see a group of matinee girls, who would yield place to a hostess and her dinner guests, and then would appear blcycle girls, golfing girls, boating girls; and still again summer girls of the duffy sort, with their filmy dresses, broad hats and parasols.

There were school girls hurrying to morning class, and girl graduates all in white, and shirt-waist girls, and khaki girls, and almost as many kinds of girls, indeed, as grow.

The prettiest of all the girls were the baby girls, for there were tiny tots of less than six who promenaded with airs of importance. All these walking fashion plates must have been drilled to good purpose, for they moved quietly and with much grace, adjusting their scarves, opening and closing parasols and deporting

themselves with the gravity befitting a masque of the styles. The exhibition was as complete as it

The railroad tocks retired into the background of the stock market to-day and gave place to the industrials and specialties. Sugar almost outdid its

traditional reputation for uncertainty by suddenly retracing its course yes-terday and mounting, well above yesterday's high point. There was a munentary decline of less than a point at the opening and then a quick rally and the stock never got back to last night's closing level. Twice during the late dealings it was 13 points above the low evel in the morning and its net gain is 1114 per cent. The transactions in the stock were enormous and the buying without a doubt came very largely from urgent demand from the shorts was prompted by what they believed were evidences of buying for the account of cism on the part of the speculative pub-lie regarding the sincerity of the pessimistic official outgiving which caused stock. Wheat opened easier, because of lower cables from Liverpool, May ½@3c under yesterday at 65½c65½c. In a short time the price sunk from that to 66%c, where the report of damages to the French crop made its habitual appearance, and joined with news of a blizzard in Austria and higher markets at Berlin and Buda Pest, caused a recompromise of the Sugar trade war and were veiled intimations that the opposition refiners had been emulating the example of the Metropolitan Street Railway interests in the Third Avenue coupon by nequiring Sugar stock at the decline. At all events the shorts in the stock were acutely perturbed in mind and scrambled to obtain stock. The local tractionstocks furnished the other surprise in the market, and like Sugar, developed aggressive strength in the free of had news. The demand in this in the strength and activity. There opposition refiners had been emulating

surprise in the market, and like Sugar, developed aggressive strength in the face of bad news. The demand in this group undoubtedly came from the shorts. The figures given out from Albany last night of the valuation placed upon the franchises of the New York Traction companies were as high as the most extravagant estimates in, Wall street. With the exception of a preliminary drive which carried the stocks down from 1½ to 4 points, the whole group was eagerly bought all day, rising well above last night's figures and not falling far below that level again. People's Gas and a number of the industrial group. The demand for the railroads seemed to have quieted down for the time being, with the exception of a stock here and there in the list, which showed a good advance. Profit taking was the motive of the selling prompted by the week's considerable advance. But the pressure upon the money market incident to the quarterly settlement next week which was manifest in foreign markets even more than here, had its influence in checking the buying movement. As the buying of the specialties was largely to cover note admitted was a cluster of red the railroads seemed to have quieted
